

## **1. Notes on the documentation**

Please hand over all the documentation to the user of the appliance. The user must keep these documents in order to be able to consult them if necessary. No liability is accepted for damage caused by failure to follow these instructions. All measurements in this manual are expressed in mm.

## **2. Warnings for safety and correct use.**

The articles are products that comply with the latest technical developments and with the safety rules in force. The trolleys of the TRAY line, object of this manual, are designed and built in accordance with the relevant technical directives and regulations, to guarantee a safe and reliable product. Any other use is considered non-intended. The manufacturer assumes no responsibility for damage caused by improper use. Responsibility lies solely with the user.

Intended use also includes compliance with the instructions for use and installation and all supplementary documentation as well as compliance with inspection and maintenance conditions.

**3. Warranty** We thank you for purchasing a product designed and built for use in professional work environments. For construction and commercial needs, the manufacturer reserves the right to make changes to the products at any time that improve their use and quality, in compliance with European Union legislation, guarantees its products for 12 months from the delivery date. This warranty does not include electrical parts, labor and all replacements made necessary by improper use of the product. Any manipulation carried out automatically excludes the manufacturer's liability. The products or parts to be replaced or repaired for unequivocal manufacturing defects and the materials used must be received "carriage paid" at the manufacturer's premises, which after careful inspection, will carry out the repair or the replacement of the same. Repairs are carried out only and exclusively at the manufacturer's premises, and in no case will the manufacturer reimburse any costs incurred by the customer for repairs made by him unless expressly agreed.

## **4. Installation and assembly.**

This article is packaged and shipped disassembled. Assembly of the same must be carried out by qualified personnel. The manufacturer declines all responsibility for damage to things or persons deriving from non-observance of what is described in this manual. Do not make any structural modification to the trolley. The elements that make up the package (plastic, polyurethane foam, bubble wrap, polystyrene, cardboard etc.) must be kept out of the reach of children as they are potential sources of danger and must be collected and disposed of separately, in accordance with current legislation.

## **5. Cleaning and maintenance**

The cleaning of the stainless steel and chromed parts can be done with a soft cloth soaked in alcohol, it is recommended to always dry very well in order to avoid the persistence of halos.

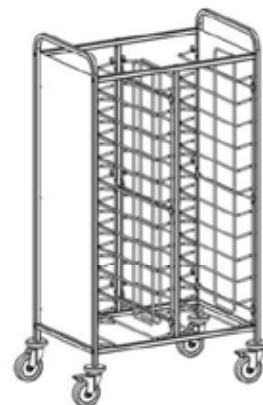

## **6. Disposal**

At the end of its life cycle, the trolley must be disposed of in accordance with current regulations and it is necessary, where possible, to disassemble it and differentiate the various components.
